EDUCATION

Current Studied

University/College Details

CSE at Sylhet Polytechnic Institute
(2020 - 2024)

SKILLS

HTML
CSS
Javascript
Bootstrap
Python
MySQL

WORK EXPERIENCE

About my work

"I am passionate about creating dynamic and interactive applications that solve real-world problems. I have successfully developed multiple projects showcasing my expertise in both full-stack web development and Python programming. My notable achievements include building a comprehensive college management system and a student management portal, along with full-stack websites for various domains such as e-commerce, restaurant management, and medical management systems.

In Python, I have ventured into game development, creating engaging games like Snake and a Top-down Shooter. Additionally, I have worked extensively with data analysis using Pandas, delivering meaningful insights through well-organized and efficient datasets. Each project reflects my dedication to learning, adapting, and improving as a Full-stack Developer and Python enthusiast, with a continuous aim to grow in the fields of web development, data analysis, and advanced programming."

About my projects

I have done many kind of Project about Web and Python.

- Full stack Website of Sylhet Polytechnic Institute
- Responsive Food And Restaurant Website
- Responsive Multipage Website Design
- Restaurant Website-Foodies
- Responsive Coffee Shop
- Hospital Website Design
- Inventory Management System
- Students Management System
- Android Calculator
